

Position: Senior Software Tester

Greetings of the Day!! Dinero Software Pvt. Ltd. Is an innovative Software Development Company that utilizes the latest technologies to bring the best software for our client's needs.

Eligibility: Any graduate having 5+ years exp.

Salary: Best in industry

No. of Opening: 1

Week Offs: Saturdays & Sundays

Job Overview:

- We are looking for a Senior Software Tester with strong expertise in manual and automation testing, database validation, and API testing.
- The ideal candidate should have experience in testing web-based applications and web API while ensuring high-quality deliverables.
- This role also involves mentorship, process improvements, and collaboration with cross-functional teams to enhance testing frameworks and processes.

Key Responsibilities:

1) Test Planning & Execution

- Develop, execute, and maintain comprehensive test plans, test cases, and test scripts for functional, regression, UI, API, and database testing.
- Ensure high test coverage across different layers of the application.
- Evaluate, review, and test new or modified software to verify adherence to user requirements.
- Identify, report, and track defects using tools like JIRA while ensuring timely resolution.

2) Automation & Performance Testing

- Implement and enhance test automation strategies to improve efficiency and reliability.
- Automate test cases using tools like Selenium WebDriver.
- Conduct performance testing using appropriate tools.

3) Quality Assurance & Process Improvement

- Ensure the delivery of high-quality software releases by incorporating best practices in software testing.
- Identify opportunities for process improvements and optimize testing workflows.
- Work on CI/CD pipeline integration to enable continuous testing and deployment.

4) Collaboration & Mentorship

- Work closely with developers, product managers, and stakeholders to clarify requirements and resolve issues.
- Mentor junior testers by sharing best practices and guiding them through complex test scenarios.
- Actively propose innovative solutions to improve software quality and team efficiency.

Required Skills / Qualifications :

- 5+ years of experience in manual & automation testing for web-based applications and services.
- Strong expertise in SQL for database validation and data integrity testing.
- Experience with API testing using tools like Postman.
- Hands-on experience with test automation tools and Techniques.
- Proficiency in bug tracking.
- Experience with Agile methodologies, CI/CD pipelines, and version control systems.
- Strong problem-solving and analytical skills with a detail-oriented approach.
- Excellent oral and written communication skills to work effectively with cross-functional teams.
- Ability to mentor junior testers and contribute to team growth.

Preferred Skills & Additional Experience :

- Understanding of Digital Marketing concepts.

Work Location - Andheri East. Interested candidates can send their updated resume on hr@dinerosoftware.com

Regards,

Human Resource.
